Project Design Phase
Proposed Solution

Date	5 April 2026
Team ID	
Project Name	**Revolutionizing Agriculture with AgriEdge Or-Mange Ltd: A Salesforce-Driven Order Management Solution**
Maximum Marks	100 Marks

Proposed Solution :

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Farmers and agricultural suppliers face fragmented order management, leading to delays, lost orders, inaccurate inventory tracking, and poor visibility for both suppliers and administrators. Existing manual or semi-digital systems cannot scale or support offline operations in rural areas.
2.	Idea / Solution description	**AgriEdge Or-Mange Ltd** is a Salesforce-driven order management platform with mobile and web interfaces. It allows farmers to place and track orders, suppliers to manage inventory and shipments, and administrators to monitor analytics. Key features include automated order processing, real-time inventory updates, supplier/logistics API integration, offline-first mobile support, and actionable dashboards.
3.	Novelty / Uniqueness	- Salesforce-powered integration for CRM, order, and inventory management in one platform. - Offline-first mobile app for low-connectivity rural regions. - Real-time API connections to suppliers, logistics, and payment gateways. - Data-driven reporting and AI-supported demand forecasting.
4.	Social Impact / Customer Satisfaction	Farmers experience faster, more reliable order fulfillment. - Suppliers and logistics partners gain visibility and operational efficiency. - Reduced operational errors, fewer lost orders, and improved transparency. - Empowers rural farmers with digital tools, increasing trust and adoption of technology.

5.	Business Model (Revenue Model)	- Subscription-based model for suppliers and distributors. - Transaction fee per order processed through the platform. - Premium analytics and reporting services for administrators and enterprises.
6.	Scalability of the Solution	- Cloud-based Salesforce architecture allows scaling to thousands of farmers and suppliers. - Offline-first mobile app ensures usage in low-connectivity areas. - Modular APIs allow integration with additional logistics, supplier networks, and payment providers. - Can expand to multiple regions, crops, or agricultural product categories without re-architecture.
