Maximum Marks	100

Project Overview:

Project Name: Revolutionizing Agriculture with AgriEdge Or-Mange Ltd: A Salesforce-Driven Order Management Solution

Project Description:A comprehensive Salesforce-powered order management system for the agriculture sector, designed to streamline order processing, track inventory, enhance customer experience, and provide actionable insights through dashboards and reports. The solution integrates web and mobile interfaces with automated workflows, data analytics, and reporting features for farmers, distributors, and administrators.

Project Version: 1.0

Testing Period: 01 Apr 2026 to 15 Apr 2026

Features and Functionalities to be Tested

- **User Registration & Login**
  - Email registration, social login (Gmail, Facebook)
  - Email confirmation and OTP verification
- **Order Management**
  - Order placement, modification, and cancellation
  - Order tracking and status updates
- **Dashboard & Reports**
  - Data visualization (line charts, bar charts, pie charts, KPI cards)
  - Story/report design with interactive filters
  - Calculation fields (Total Orders, Monthly Revenue, Average Order Quantity)
- **Notifications & Alerts**
  - Confirmation emails for registration and orders
  - System alerts for failed transactions or errors
- **API Integration**
  - External APIs for weather, product verification, and Aadhar validation
- **Performance & Reliability**
  - Response time under 3 seconds for core functions
  - **System stability under multiple concurrent users**
- **Data Handling & Security**
  - **Proper preprocessing, filtering, and secure storage of user and order data**

Testing Environment

URL / Location:

- **Web Application:** https://agriredge-orders.example.com
- **Mobile Application:** Available on Android/iOS (Test Build version 1.0)

Credentials (if required):

- **Username:** testuser@example.com
- **Password:** Test@1234

Environment Details:

- **Browser:** Chrome 114+, Firefox 112+, Edge 112+
- **OS:** Windows 10/11, macOS Monterey, Android 12+, iOS 15+
- **Network:** Stable internet connection (Wi-Fi / LAN)
- **Database:** MySQL (Cloud / Local Test Environment)
- **Server / Backend:** Salesforce Sandbox Environment
- **APIs:** External APIs configured for testing mode

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration via Email	1. Open registration page 2. Enter valid email, password, confirm password 3. Click “Register”	User account is created and dashboard is displayed	positive	pass
TC-002	...Email Confirmation	1. Receive registration email 2. Click confirmation link	Account is confirmed and user can log in	positive	pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	User cannot log in via Gmail	1. Click “Login with Gmail” 2. Enter Gmail credentials 3. Click “Allow”	High	open	ssue occurs only on mobile app; web login works
BG-002	Dashboard chart not updating after applying filter	1. Go to Dashboard 2. Apply “Region” filter 3. Observe charts	Medium	In Progress	Happens intermittently on Chrome v114

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
