Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	5 March 2026
Team ID	
Project Name	**Revolutionizing Agriculture with AgriEdge Or-Mange Ltd: A Salesforce-Driven Order Management Solution**
Maximum Marks	100 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through Facebook/LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User Login	Login through Email & Password Login through Gmail Login through Facebook/LinkedIn

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The system must have an intuitive and user-friendly interface for both mobile and web users, allowing farmers, executives, and admins to perform tasks with minimal training.
NFR-2	**Security**	The system must ensure secure user authentication (email/password, OAuth), protect sensitive customer and order data, and comply with data privacy regulations (e.g., GDPR).

NFR-3	**Reliability**	The system must operate without failures, with automated error handling and recovery mechanisms to ensure continuous order processing.
NFR-4	**Performance**	The system must respond to user requests (e.g., order placement, dashboard loading) within 2-3 seconds under normal load conditions, supporting real-time updates.
NFR-5	**Availability**	The system must be available 99.9% of the time, with minimal downtime for maintenance, ensuring farmers can access the platform anytime.
NFR-6	**Scalability**	The system must support growth in users, orders, and data volume without performance degradation, leveraging Salesforce cloud capabilities for scalability.
